

## Hightouch Hightech After School Science Program

returns to MWE for 2009/2010

- For all **1st grade through 6th grade** students
- 1st Session begins **Sept. 30th through October 21st**
- Each session consists of **4 consecutive Wednesday classes**
- Fresh **new curriculum** every **new session**
- **Enrollment fills up fast** - often within the first two days
- **Two scholarships available** for those students meeting the requirements (first come basis)
- **Hands-on science** that is totally participatory and fun
- Children learn real science and do **real science experiments**
- Children experience being **geologist** sifting for gemstones, **chemist** working with real chemicals, **biologist** handling real kidneys, **anthropologist** digging for fossils and more!
- **Take-home** experiments too!

For more information visit Hightouch Hightech's website at [www.ScienceMadeFunWLA.net](http://www.ScienceMadeFunWLA.net)

Hightouch Hightech will be at Mt. Washington Elementary again this school year providing after-school science programs. Each class will last 30 minutes and at the end of each class, young scientists will receive a take-home experiment. For over 15 years, this unique program has been offering children across the nation the opportunity to experience real, relevant and age-appropriate science right in their classroom. Patrick, the Hightouch Hightech scientist, is an enthusiastic and professional educator working year round to fuel the imagination of children in Los Angeles schools.

**Enrollment is limited and based on a first come first served basis.**

**1st Session starts Wednesday, Sept. 30th through Oct. 21st in the Multi-Purpose Room**  
**New class sessions begin every 4 weeks!**

**1st, 2nd and 3rd grades: 3:00-3:30**

**4th, 5th and 6th grades: 3:30-4:00**

**Cost: \$24 for a series of four classes - Please make checks payable to High Touch High Tech, Inc.**

**Be on the lookout for enrollment forms in backpacks!**

**Thanks for supporting this program!**
